RE: Sending email to anyone (teachers, administrators, Central Office personnel, etc.) in Craven County Schools

Parents and Students,

Our tech people have asked for parents sending emails to teachers to put the word "parent" at the front of the subject line.

Here is the email below.

Please contact your parents and have them put Parent as the first word in their subject emails to you. Several of our local email providers; Embarq, ec.rr.com have been placed on blacklists for spamming and our software is stopping the emails. Parent at the front of the Subject line will allow me to search and forward these emails to you.
