

April 19, 2010 afternoon

Dear Parents and Students,

I just wanted to send an email with an update on John and Amanda's condition at Pitt Memorial Hospital. Neither John nor Amanda have life-threatening injuries. Amanda has a few broken ribs, a few breaks near her pelvis (these will not interfere with walking/running), a laceration on her kidney (not that big of a big problem), and cuts and bruises. She is expected to be out of the hospital in 4-5 days. John's injuries include a few broken teeth, a broken nose, and cuts and bruises. John should be going home with Lori and Mike today. Both of the children are still in the Emergency Room at Pitt, and have not been assigned a room yet.

If I hear of any more details I will let you know. Please continue to keep the family in your thoughts and prayers.

Thanks,
